and Engineering

COPMANY PROFILE 2024

SPS Provides Extensive Range of Materials and solutions
for Oil & Gas, Industrial, Power, Marine & Rail.

INDUSTRY

OIL & GAS

WATER

POWER

WWW.SPS-TRADING.COM

is a full-service provider of customized cathodic protection systems to the oil & gas, power, water/wastewater, and other infrastructures industries.

SERVICES	12

Who we are

- 01 SPS provides an extensive range of Oil and gas, Petrochemical, Industrial, Power generation, Marine, and related equipment and materials.
- 02 We focus on Asset Integrity Protection against Corrosion, Such as Cathodic Protection, Corrosion Monitoring, Coating, and innovative sealants.
- 03 Our core business is Trading and Engineering services. We are happy to be considered a solution provider for different clients and sectors, All over The Middle East with full success.
- 04 Our staff are distinguished by their functional and technical expertise combined with their hands-on experience, thereby ensuring that. our clients receive the most efficient. and professional service.
- 05 Our solutions help you safeguard the integrity and profitability of assets and products for their entire lifecycle. In doing so, we help protect the lives of those involved with them.
- 06 We are proud and honored to be a key player in the development of the Middle East infrastructure. A complete solution is what we stand for.

SPS helps operators in Onshore / Offshore industries to protect their assets, to increase uptime and reduce maintenance costs.

Activities

SPS Committed to supply the following products, designed according to international standards and manufactured by reputable suppliers.

Automation and Instrumentation:

We Supply different Ranges of Instrumentation and Automation related Products to various industries from reputable manufacturers as below:

- Pressure, Temperature, Flow, and level Gauges.
- PLC Modules
- Motor drives
- Sensors
- Power Supply, HMI's.
- Thermocouples.

Endress+Hauser

VEGA

ABB

SIEMENS

Pin Brazing:

We supply different ranges of Pin Brazing Kit which are used to Attach Cables with Pipelines, Tanks and Railway Rod:

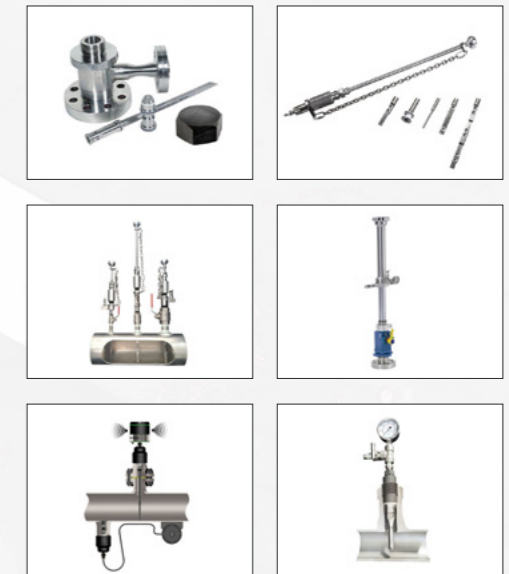

- Complete EasyBond Kit for Oil & Gas Application.
- BB2 & BB3 Kit for Railway Application.
- Brazing Pins with/without fuse, Threaded ...etc.
- Ferrules, Holders, ...etc.
- Kit Accessories.

Internal Corrosion Monitoring:

We supply a whole range of Chemical Injection systems. They are also essential to corrosion control and increase production performance.

- Access Fitting Corrosion Coupons.
- retractable Coupon Holder.
- Service Valve Kit.
- Corrosion Instruments.

Corrosion Prevention and Sealing:

We supply innovative systems for Coating and wrapping to ensure safe energy transport. These systems are relevant to different applications for Pipelines and Tanks.

- PE/Butyl Rubber Cold Applied Tapes.
- Polyurethane Coating.
- Heat Shrink Sleeve and Repair Systems.
- Petrolatum Tapes & Mastics.
- Mechanical Protection Systems & Epoxy Coatings.

Cathodic Protection:

We supply a complete range of Cathodic Protection materials to Protect External Onshore/Offshore Pipelines and Tanks as below:

- Transformer Rectifiers (Oil & Air) Cooled.
- MMO, Si-Fe, Ribbon, ...etc. Anodes.
- Galvanic Anodes.
- Portable/Permanent Reference Electrodes.
- Anode / Cathode Junction Boxes.
- Test Stations.
- Polarization Cells.

**Insulating Monoblock:**

Monolithic Insulating joints are used to ensure electrical discontinuity of the pipeline. we supply different Ranges, for Insulating Joints for Oil, Gas & Water Pipelines as below:

- Monolithic Insulating Joints (different diameters and different Pressure ratings).
- Gas Risers.
- Linear Expansion Joints.
- Gas Compensation Tanks.

**Remote Monitoring System:**

Real-time monitoring of corrosion parameters plays a crucial role. We offer a customized web-based ICCP monitoring portal. This gives asset managers insight in the protection levels of each asset.

- Accurate Measurement for ON/OFF Potential.
- IRFree Potential Measurement on Coupons.
- Measurements of Current Signals with Shunts and Other Voltage Measurements.
- Real-Time Monitoring on External Powered Devices.

SPS considered as official representative/agent for the below suppliers:

Agencies

BAC Corrosion: Made in the UK

Provide Complete Solutions against Corrosion for Onshore Pipelines, Storage Tanks, and Steel in Concrete. BAC design and manufacture:

- Cathodic Protection Power Control Systems.
- MMO, SI-Fe, Ribbon, ...etc. Anodes.
- Pin Brazing.
- Test Stations & Junction Boxes.
- Reference Electrodes.

OES Group: Made in the UK

OES offers Aluminum and Zinc sacrificial anodes for the following applications:

- Maritime: GACP for vessel hulls, Tanks, and ancillary equipment.
- Oil & Gas: Bracelet Anodes for Pumps and risers, Tank Anodes, and Hull Anodes.
- Harbors: Design and supply of GACP Systems.
- Smart Antifouling Solutions.

Denso Group: Made in Germany

High-quality and forward-thinking of Sealing solutions:

- PE/Butyl Rubber Cold Applied Tapes.
- Polyurethane Coating.
- Heat Shrink Sleeve and Repair Systems.
- Petrolatum Tapes & Mastics.
- Mechanical Protection Systems & Epoxy Coatings.

Rysco Corrosion: Made in Canada

specialized in Internal Corrosion Monitoring, and Inhibitions for Oil & Gas Pipelines.

Rysco Design / Manufacture Products and systems to the highest quality as:

- Access Fitting systems.
- Corrosion Probes, Coupons
- Retractable & Service Valve Kit.

Our Products are Compatible with others such; Caproco, Cormon, Cosasco, ...etc.

GT Piping Solutions: Made in the UK

GTP is a world-class supplier of high-pressure piping systems, along with the ability to supply loose system components.

- Drilling Manifolds.
- High-Pressure Manifold Fittings
- LNG Transfer Hoses.
- Hubs and Clamps.

Services

SPS's qualified technical team of Engineers provides our clients with a fully satisfying service up to international standards and techniques. Furthermore, we submit a full report to ensure that the material functions properly and those manufacturers' warranties remain valid.

Site Survey

We offer different types of Corrosion surveys for Pipelines and tanks.

- Buried External Pipelines.
- Internal and External tanks.
- Offshore Jetty and Harbors.
- CIPS & DCVG.

Design & Engineering

SPS can provide a full system Design and Engineering Calculations for different types of structures including Pipelines & Tanks, as well as; Materials detailed specifications. Our system selection of designing depends on Corrosion international standard.

Installation Supervision and System Commissioning

SPS supervises installations, furthermore System Commissioning, and Startup for all equipment in accordance with manufacturer specifications and international standards.

Training

SPS demonstrates and trains personnel to operate and program the equipment. We also instruct users on the performance of any daily and/or periodic routine maintenance required by the manufacturer.

THE ASSETS YOU OWN NEED TO BE PROTECTED.
AND WE "SACRIFICE" OURSELVES FOR IT.
